

25 YEARS OF EXCELLENCE

# Earth master

Underground water storage tanks are used for underground storage of portable drinking water, wastewater & rainwater collection. The ribbed design of water cistern tanks makes it capable of being buried underground, supporting the surrounding soil. Megha Earth master underground water tank is a great alternative to concrete tank by preventing threat of plant roots.

# Beauty White

## WHITE TANKS

The bright white pearl tanks adds the beauty of your building. It reflects the sun rays and makes the water storage more clean & hygienic. The three layer tank gets extra strength hence longer life. Also we can watch directly and clearly, any growth of fungal or impurities everyday.

# Black star

## PREMIUM WATER TANKS

Whenever water will be consumed, safety becomes an issue because the growth of both fungal, microbes, insects must be inhibited. Many algae and bacteria are light sensitive. Therefore, blocking the sun from the water contained inside becomes a primary consideration in the selection of black plastic tanks.

With 25 years & Experience, Megha water tanks stands tall as the most trusted and reputed brand for plastic water storage tanks in south india. Now we introduce our new triple layer and under ground water tanks with threaded quality.

We pursue a well defined quality management system that involves proper check of raw material, highest engineering standards, guaranteeing quality and reliability in every product .

- Megha Tanks is made out of the most ideal grade of Polyethylene having excellent environmental stress Crack resistance(ESCR), high load bearing properties, and non- corrosive, capable of withstanding all weather conditions.
- Suitable stabiliser additives provide high resistance to UV effect, and similar atmospheric hazards.
- The FDA approved food grade polyethylene used for 'MEGHA' tanks, being non - toxic and non-absorbing, is unbreakable and without any colour or taste, totally safe and ideal for storage of drinking water.
- The inner and outer walls of tank are clean, smooth, seamless and warpless, and easy to clean.
- 'Megha' is moulded in single piece without any joints or patches, which makes it quite durable and leakproof.
- Inspite of all the 'superb' qualities megha possess, the price, are quite reasonable.
- Available in various sizes ranging from 200 Litres to 5000 litres to suit the requirement of the customer.
